

HealthView Billing

LUMEDX Billing Management provides heart centers with complete charge capture, accurate coding, and automated billing. With Billing Management, all major elements of cardiovascular charges and equipment usage are captured and transmitted to medical records, hospital billing, and materials management.

Billing Management saves you time, while enabling heart centers to maximize reimbursement—a true, measurable ROI.

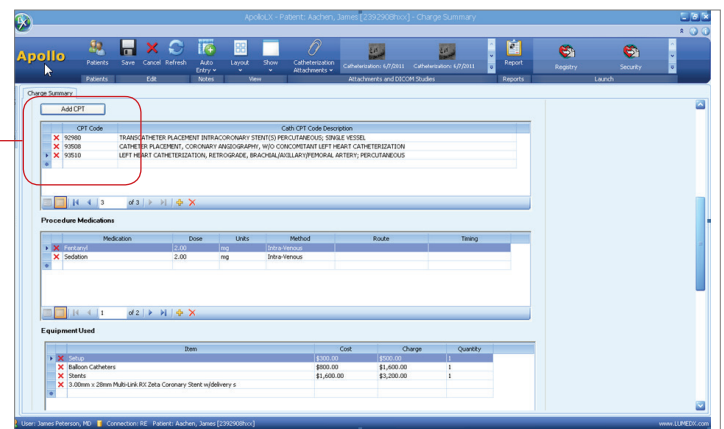

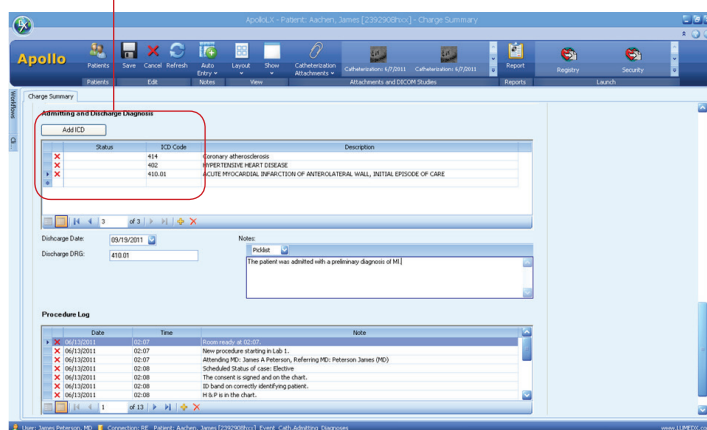

Features

- Capture necessary patient data for billing:
 - ◆ Diagnoses
 - ◆ Procedures
 - ◆ ICD-9
 - ◆ DRG
 - ◆ CPT
 - ◆ Equipment
 - ◆ Professional services
- Comprehensive Charge Summary Report
- Auto-distribution of report to physicians and medical records
- Laser light barcode wand scans in equipment, codes, or preference cards
- Integrated with Apollo database and solutions

Benefits

- Point-of-care coding captures data while physicians and staff are focused on the case
- Capture all applicable charges to maximize third-party reimbursement
- Automation streamlines workflow and creates efficiencies
- Eliminate billing mistakes, saving the heart center thousands of dollars
- Track trends in billing and reimbursement; identify areas not properly reimbursed and make adjustments to maximize revenue
- Speed up reimbursement and shorten the revenue cycle

Detail procedures, equipment, and applicable ICD-9, CPT, and DRG codes to be billed.

Charge Summary data entry screen follows same format as completed report.
