Registries & Accreditation

As quality improvement, pay-for-performance and value-based purchasing initiatives expand, hospitals performing cardiovascular services are challenged to find cost- and time-effective ways to participate in the registries. LUMEDX software dramatically streamlines the data collection-and-submission process, saving valuable staff time while improving data accuracy. In addition, when you invest in LUMEDX registry solutions, you receive more than a straightforward way to collect and submit data. LUMEDX registry tools help your hospital continually improve its outcomes and become a true center of excellence.
