FOR IMMEDIATE RELEASE

LUMEDX and DASpecialists Announce Strategic Partnership

Cardiovascular Registries data collection and information leaders collaborate to create solutions for hospitals

Burlington, NC, May 1, 2017 – DASpecialists, LLC a leading provider of data abstraction and support services for mandated or voluntary cardiovascular registries and LUMEDX Corporation, a market leader for cardiovascular data intelligence and information systems (CVIS), announce today they are partnering to create solutions for cardiovascular data management for U.S. hospitals.

The partnership brings together DASpecialists' expertise and experienced clinical nurse analysts for both the ACC NCDR and STS data registries with LUMEDX's unique suite of cardiology data analytics, integration and registry tools.

"This collaboration will provide DASpecialists and LUMEDX hospital customers expanded and multiple affordable solutions for data collection and reporting requirements. With today's budgetary constraints and the expanded reporting requirements for 2017, both companies will increase the level of customer service and value hospitals require." said Pamela Rottman, President of DASpecialists.

"LUMEDX's cardiovascular registry and clinical workflow solutions help hospitals meet reporting requirements while improving efficiency and supporting quality of care. DASpecialists' services are a perfect complement to LUMEDX's offerings. In fact, DASpecialists are providing data abstraction services for several of our customers currently, and these hospitals are very pleased. We believe that this new partnership will enable us to deliver even greater value to our customers," said Gwendelyn Korney, VP of Corporate Accounts at LUMEDX.

About LUMEDX:

LUMEDX is the market leader in cardiovascular data intelligence and cardiovascular information systems (CVIS). Our comprehensive suite of software and services enables meaningful analytics, high-performance workflows, optimal integration of clinical and EHR data, and improved continuity of care. We develop all our solutions with the firm belief that the delivery and management of healthcare is best served by a community of providers linked—and empowered—by technology.
