October 28, 2014, Oakland, CA — LUMEDX Corporation, a leading provider of integrated cardiovascular imaging and information systems (CVIS), announced today that Chinese Hospital in San Francisco has chosen LUMEDX to supply information and image management to its cardiopulmonary services department. LUMEDX stated that its cloud-based HealthView CVIS will put Chinese Hospital at the forefront of healthcare information technology, and will help practitioners deliver top-quality care while improving cost-efficiency. Data analytics, image management, electronic physician reporting, and integration tools were cited as the key components of the Chinese Hospital CVIS.

An independent healthcare facility serving San Francisco's Chinese and Asian communities for over 100 years, Chinese Hospital offers a full range of diagnostic cardiac procedures, including electrocardiograms (ECG), electroencephalograms (EEG), echocardiograms (Echo), stress testing, and others. LUMEDX's HealthView is a cloud-based CVIS enabling end-to-end clinical, financial and operational information management in an economical software-as-a-service (SaaS) delivery model.

"With the installation of HealthView CVIS, Chinese Hospital continues our tradition of leveraging the latest technology to deliver high-quality patient care that results in quality clinical outcomes while reducing cost for the community we serve," said Elena Wong, Manager, Cardiopulmonary Services.

The HealthView CVIS to be deployed at Chinese Hospital includes the following solutions:

- HealthView CardioPACS 6
- HealthView Echo Physician Structured Reporting
- HealthView ECG Manager
- Analytics reports for ECG and Echo
- A suite of integration tools to enable interoperability between hospital information systems, clinical devices and Apollo, including:
 - ✧ Admission, Discharge, Transfer (ADT) Interface
 - ✧ Orders Interface
 - ✧ Results Reporting Interface to the electronic medical record

"We at LUMEDX admire Chinese Hospital's commitment to clinical excellence and cost containment," said LUMEDX Vice President of Strategic Products Praveen Lobo. "Our HealthView hosted-CVIS platform aligns with these goals by making specialized cardiovascular software applications available at a much lower cost of ownership than traditional hospital-hosted CVIS

applications. By choosing HealthView, Chinese Hospital is embracing the future of healthcare technology.”
