FOR IMMEDIATE RELEASE

Marshall Medical Centers Goes Live With Two LUMEDX Cardiovascular Data Management Solutions

Echo Workflow and ECG-Holter Software Implemented Successfully at Two Hospitals

November 30, 2016 06:30 AM Eastern Standard Time

OAKLAND, Calif.—(BUSINESS WIRE)—LUMEDX Corporation, the market leader in fully integrated cardiovascular data intelligence and imaging solutions, announced today that two Marshall Medical Centers hospitals have gone live with the first phase of a cardiovascular information system (CVIS) deployment. The two hospitals now using LUMEDX CVIS software are Marshall Medical North in Guntersville, Alabama; and Marshall Medical South in Boaz, Alabama.

The newly implemented applications will help Marshall Medical Centers (MMC) improve performance and quality of care while containing costs and minimizing inefficiency. LUMEDX's PACS with Echo workflow management and ECG management solutions provide the two Marshall hospitals with data that can be used to make meaningful and positive changes in their treatment of cardiology patients.

"We are pleased to have Marshall Medical Centers as a member of our very large family of CVIS users, now that our Echo and ECG management solutions are in use at their hospitals," said Mickey Norris, Vice President of National Sales at LUMEDX. "Feedback from physicians and staff has been very positive, and they are looking forward to the rest of the solution going live in the next few months."

Other applications to be deployed via LUMEDX's HealthView cloud at MMC include:

- Analytics dashboards and reports for managing MMC's cardiovascular business
- Nuclear Physician Reporting with Stress integration
- ECG management expansion to other modalities
- Additional Integration points with the EHR and multiple clinical devices
- Workflow management tools for: Cath and PV Invasive, including physician reporting and automated billing

About LUMEDX Corporation: LUMEDX is the market leader in cardiovascular information systems and a pioneer in CV data intelligence. Our comprehensive suite of software and services enables meaningful analytics, high-performance workflows, optimal integration of clinical and HIS data, and improved continuity of care. We develop all our solutions with the firm belief that the delivery and management of healthcare is best served by a community of providers linked—and empowered—by technology.
